[Bac Cooling Tower Serial Number Age](#)

You need a water treatment programme that meets your needs and is in full compliance with local legal requirements and codes of practices.. This is why our Balticare service company offers a wide range of automatic water treatment and filtration packages to control microbiological growth in cooling systems incorporating BAC equipment.

We advise you to contact your to discuss your needs and find the best solution for your cooling equipment.. Effective water treatment programmes act in a preventive manner by automatically controlling the dosing of chemicals and bleed-off to keep your cooling tower not only safe but also efficient.. A clean, properly treated and well maintained cooling tower avoids growth of bacteria, including legionella.
